Mount Kilimanjaro

Mount Kilimanjaro is Africa's highest mountain at 5895 metres. The second highest is Mount Kenya at 5195 metres. Kilimanjaro used to be within the boundaries of Kenya. Legend has it that Queen Victoria gave the mountain to Kaiser Wilhelm in 1848 because he commented that it was unfair that Kenya had the two highest peaks. Since 1889, several attempts have been made to determine the exact height of the mountain. The Kilimanjaro 2008 Precise Height Measurement Expedition used GPS and gravimeter methods to output the value of 5,891.8 metres (19,330 ft). Due to Kilimanjaro's equatorial location and high elevation, almost every climate type on earth is represented, including a year-round snow-topped summit.
